

Case Study

Nypro Inc. Improves Internal Sharing of Project Data Using Windchill ProjectLink

Company Background

- Nypro Inc. is the leading global provider of precision plastics injection molding and related manufacturing solutions operating 61 companies in 17 countries; including 40 manufacturing facilities worldwide

Opportunity

- To reduce resources and man-hours required for program development, decrease travel costs, and eliminate non-value added communication, and ultimately get products to market faster

PTC Solution

Windchill ProjectLink makes global communication and data sharing among team members more efficient by providing a central repository that increases access to the latest documents, CAD files and drawings to any team member, anywhere, anytime

Results

Using PTC Solutions has enabled Nypro Inc. to:

- Increase the efficiency of the entire product development process
 - Provide a consistent project structure for keeping Program Managers on the same format and bringing new team members up to speed faster
 - Increase engineering productivity due to less time spent on non-value added activities
- “Using Windchill ProjectLink provides the global team with up-to-the-minute information, which makes data sharing more efficient, and makes Nypro’s value proposition more competitive.”*
- ~ Mike McGee, Global Program Manager, Nypro Inc., Copenhagen
