

# Quality Server

Functionality and Flexibility at a Competitive Price

Manage Batch Operations for ModelCHECK<sup>®</sup>, Control Custom Checks and Access Summary and Detailed Reports

- Multi-model processing
- Operates on models stored in Windchill or in a Windows Directory
- Processes ModelCHECK standards, custom checks and corrections
- Summary reports with links to detailed HTML reports
- Summary and detailed trend reports
- Output reports to PDF, Excel, Word or HTML Link

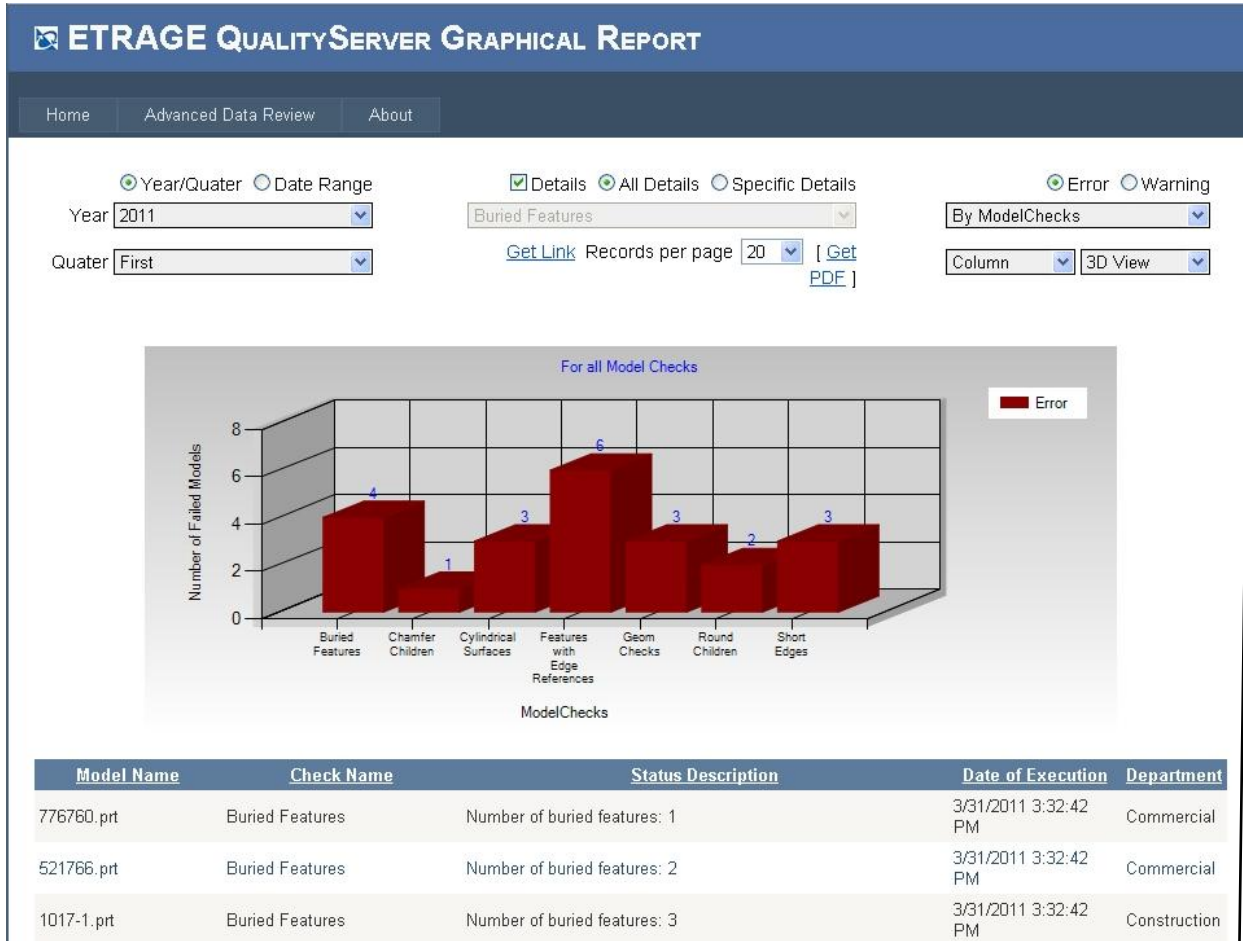

The Quality Server provides a simplified method for managing the quality of Pro/ENGINEER models stored in Windchill or in a Windows directory and executing ModelCHECK standards as well as custom checks. The Quality Server provides summary with links to detailed reports in HTML format, that can be used to track issues and trends.
